

EDUCATION

University of California, Riverside	Expected: Fall 2026
B.S., Computer Science with Business Applications,	Riverside, CA
- Relevant Coursework: Database Management Systems, Data Analysis Methods, Information Retrieval, Designing and Leading Teams - UCDC Program Participant (Fall 2026): Selected for specialized internship program in Washington, D.C.	

PROFESSIONAL EXPERIENCE

U.S. Securities and Exchange Commission	September 2026 – November 2026
Student Scholar (Department of Examinations Technology and Controls Program)	Washington D.C.
- Assist examination staff in evaluating system architecture, operational resilience, and cybersecurity IT controls of financial market institutions under Regulation SCI. - Review technical documentation, IT audit reports, and risk assessment controls to ensure compliance with federal market infrastructure standards. - Perform quantitative and qualitative analysis on regulated entities to evaluate technical risk profiles and support data-driven examination initiatives.	

RISK & TECHNOLOGY PROJECTS

Airline Management System (DBMS and PostgreSQL)	April 2025
Database Project Lead	Remote
- Orchestrated a Role-Based Access Control (RBAC) framework for 4 distinct user personas, ensuring strict data governance and security protocols. - Architected a relational schema to model complex business logic, prioritizing data integrity and retrieval efficiency for audit-ready environments.	
Food Insecurity Analysis (Python & Data Science)	January – February 2026
Project Lead	Remote
- Engineered a robust data cleaning and ETL pipeline to handle complex survey data, ensuring version control and accuracy for regression analysis. - Mapped workflows for data intake and handled sensitive survey responses with high attention to detail	
Student Dropout Prediction & Behavioral Analysis	March 2026
Team Member	Remote
- Developed a machine learning pipeline to identify behavioral risk profiles, analyzing process gaps within a 4,424-instance dataset. - Conducted exploratory data analysis to validate primary predictors of risk, delivering structured documentation of findings.	

TECHNICAL SKILLS

- Risk/Compliance: IT Controls, Data Governance, System Architecture Evaluation, Audit Readiness
- Systems/Documentation: SharePoint (Exposure), Microsoft Excel (Advanced), Access, PowerPoint, Word
- Technologies: AI Tools (ChatGPT/Copilot for process mapping), PostgreSQL, SQL, Python, Java
- Professional: Project Management, Process Improvement, Structured Problem Solving
